INNOVATION AND INSPIRATION

26th Technical Seminar of the Institute of Rail Welding Commemorating the 15th Anniversary of IoRW

In Association with the Network Rail National Training Centre and the National Railway Museum, York.

The Institute of Rail Welding was formally launched in April 2002 with over 200 people attending the lunch event at the Royal Society in London. A great deal has changed since then, but the IoRW is still going strong and a number of special features have been included in this seminar to commemorate its 15th anniversary.

These include:

- Practical demonstrations show casing some of latest tools and equipment
- High profile speakers from Network Rail and associates from the industry
- Access to 300 years of history and over 1,000,000 of railway memorabilia at the National Railway Museum.

As well as reflecting on past achievements, the event will focus on key technical developments that affect rail welding. As always, a team of high quality speakers has been assembled to deliver the technical programme. As well as reporting on recent developments in aluminothermic welding equipment, arc welding techniques, and in the deployment of mobile flash butt welding by Network Rail, the event will cover broader issues such as future opportunities for IoRW Members, and the use of steel in modern railways.

Benefits of attending

A team of well-known experts has been assembled in order to give a high-level, comprehensive and practical insight into all the world of rail welding.

By attending this event you will:

- See at first hand demonstration of the latest equipment, materials and tools
- Gain a better understanding of the latest technical developments in rail welding
- Meet a wide range of suppliers, regulators and

practitioners to develop ideas and debate issues

***Attendance is limited and therefore early
enrolment is strongly encouraged!***

PROGRAMME

9:30	Registration
